WARNS AGAINST ANTI-JAP ACTION

President Sees Grave Danger in California's Attitude.

SENDS MESSAGE TO SPEAKER

Urges Him to Block Passage of Bill Barring Japanese From Schools and Threatens to Call on U. S. Courts to Decide Legality of the Proposed Law.

Washington, Feb. 9. — President Roosevelt declared unequivocally the administration's policy regarding the anti-Japanese school legislation now before California's senate. The measure proposed, he said, was certain to work harm, and maybe grave harm.

A threat to use the federal courts to test the legality of the legislation now urged, on account of the violation of the treaty obligations of the United States, was also included in the president's message to Speaker Stanton, of California. It reads as follows:

"I trust there will be no misunderstanding of the federal government's attitude. We are jealously endeavoring to guard the interest of California and of the entire west, in accordance with the desires of our western people.

"By friendly agreement with Japan we are now carrying out a policy which, while meeting the interests and desires of the Pacific slope, is yet compatible, not merely with mutual self-respect, but with mutual esteem and admiration between the Americans and Japanese.

Japan Doing Its Part.

"The Japanese government is loyally and in good faith doing its part to carry out this policy, precisely as the American government is doing. This policy aims at mutuality of obligation and behavior.

"In accordance with it the purpose is that the Japanese shall come here exactly as Americans go to Japan, which is in effect that travelers, students, persons engaged in international business, men who sojourn for pleasure or study and the like, shall have the free access from one country to the other, and shall be sure of the best treatment, but that there shall be no settlement in mass by the people of either country in the other.

"During the last six months under this policy more Japanese have left the country than have come in, and the total number in the United States has diminished by more than 2000. These figures are absolutely accurate and cannot be impeached.

"In other words, if the present policy is consistently followed, and works as well in the future as it is now working, all difficulties and causes of friction will disappear, while at the same time each nation will retain its self-respect and the good will of the other.

Grave Cause For Irritation.

"But such a bill as this school bill accomplishes literally nothing whatever in the line of the object aimed at, and gives just and grave cause for irritation, while, in addition, the United States government would be obliged to take action in the federal courts to test such legislation, as we hold it to be clearly a violation of the treaty.

"On this point I refer you to the numerous decisions of the United States supreme court in regard to state laws which violate treaty obligations of the United States. The legislation would accomplish nothing beneficial and would certainly cause some mischief, and might cause very grave mischief.

"In short, the policy of the administration is to combine the maximum of efficiency in achieving the real object which the people of the Pacific slope have at heart, with the minimum of friction and trouble, while the misguided men who advocate such action as this against which I protest are following a policy which combines the very minimum of efficiency with the maximum of insult, and which, while totally failing to achieve any real result for good, yet might accomplish an infinity of harm."

Philadelphia, Feb. 9.—Fire caused by the dropping of a match in a can of gasoline destroyed the garage of Herbert MacKellar at Overbrook. Fourteen valuable automobiles belonging to residents of Overbrook and Merion were destroyed. The loss is estimated at $75,000.

State College After Famed Medical School.

At the annual meeting of the board of trustees of the Pennsylvania State College one year ago a proposition was submitted for the affiliation of the college and the Medico-Chirurgical college, of Philadelphia, making the latter institution the medical department of State College. At the annual meeting of the trustees held in Harrisburg on Tuesday of this week, on account of a pressure of business, the matter was referred back to the special committee.

It was decided that the plan would be considered at the next meeting of the trustees, which will likely be held in June. The committee is composed of James L. Hamill, of Columbus, Ohio; Colonel John A. Woodward, of Howard, Pa.; Milton W. Lowry, of Scranton; Thomas W. Barlow, of Philadelphia, and Dr. Edwin E. Sparks, president of the Pennsylvania State College.

Within a very short time it was decided an engineering experimental station will be established at State College. Its work will be to educate the mill and factory workers of Pennsylvania, and to this end bulletins will be published periodically telling the results of experiments performed. One of the first tests will be made to learn the uses of cement, and the results will be sent out in bulletin form. Dr. John Price Jackson, dean of the engineering school, will supervise this added feature.

Another progressive step that will be valuable to the agricultural interests was taken when it was decided to start a summer school at the college to equip teachers to be competent instructors in farm subjects and domestic economy.

Officers were elected as follows: General James A. Beaver, Bellefonte, president; H. W. Mitchell, Pittsburg, vice president; Dr. Edwin E. Sparks, State College, secretary; John Hamilton, Washington, D. C., treasurer; General Beaver, H. W. Mitchell, Ellis L. Orvis Bellefonte; Gabriel Heister, Harrisburg, and Lowry, Scranton, members of executive committee.

Death of Mrs. Bridget Daley.

On Saturday evening at 10 30 o'clock, Mrs. Bridget Daley, an aged resident of Runville, Centre county, passed away at her home in that place. Her death was very sudden. She had eaten a hearty supper and had retired to bed early. About the time above mentioned her son Martin Daley, heard her coughing and going to her beside found blood spurting from her mouth. Before he could summon help she had passed away. It is believed death was due to the bursting of a blood vessel.

The deceased whose maiden name was Bridget Pearl was born in County Galway, Ireland 74 years ago. Coming to this country when quite young she first lived in Wilmington, Delaware, where in 1852 she was married to Martin Daley, who preceeded her to the grave about two years ago. CANAL WORK PLEASES TAFT

Gave Out Statement Before Sailing From Colon.

ENGINEERS PREPARING REPORT

The President Elect Says the Work is Progressing In a Most Satisfactory Way—Accompanied by Special Engineers, He Visited Every Section of the Canal.

Colon, Feb. 8.—President Elect William H. Taft and party left here on board the United States cruiser North Carolina for New Orleans, accompanied by the cruiser Montana. Just previous to embarking Mr. Taft gave out the following:

"I am not prepared now to make a statement as to the results of the trip to the isthmus except to say that we have found the work progressing in a most satisfactory way; the organization better than ever before; the esprit de corps excellent and the determination of all, even the humblest laborer directed to the building of the canal. I am sure this has impressed itself upon every one of the board of visiting engineers as it has upon me.

ARTHUR P. DAVIS.
Head of Board of Civil Engineers Accompanying Mr. Taft.

"With reference to the type of the canal and the continuance of the present plans, the engineers promise that they will be able to hand me their report by the time we land at New Orleans."

Governor Melendez and a large gathering of the Panama railroad and the isthmian canal commission employes were present at the dock to bid the president elect farewell. Lieutenant Colonel Goethals, chief engineer of the canal, accompanied Mr. Taft on the North Carolina. He will proceed to Washington to discuss the matter of appropriations necessary for the completion of the work.

As the tug which transferred the visitors to the cruiser moved away the crowd cheered lustily. Mr. Taft, looking the picture of health, bowed and called out, laughing: "Keep your eye on the subterranean lake at Gatun."

During his visit here, which lasted ten days, Mr. Taft, accompanied on many occasions by the special engineers who came to the isthmus with him, visited every section of the canal. His influence was exerted also in bringing about a better feeling between various factions that have been opposing each other since the last election.

WHAT CANAL IS COSTING

Hugh Weir Says $1200 Is Spent Every Minute For Labor.

Toledo, O Feb. 8.—"Every minute $1200 is spent for labor at the Panama canal. Every minute twelve carloads of rock and gravel are excavated. Every two minutes a ton of coal is burned up. Every hour 1666 pounds of dynamite are exploded."

These are some of the statements of Hugh C. Weir, magazine writer and author, who has just returned from a visit to the isthmus, and whose book on the Panama canal will appear in the spring.

Shuey—Klinger.

At the parsonage of the United Evangelical church Mr. J. Thomas Shuey of Lemont and Miss Pauline M. Klinger were united in the holy bonds of matrimony, Feb. 3, 1909 by Rev. J. F. Bower.

Reasonable Auto Speed Laws Needed.

As the use of the motor-car became more general, the speed limits were gradually increased, and the recognition of motor-cars as long-distance vehicles has resulted in uniform speed limits applicable throughout the State, being fixed by statue in practically all of the States where automobiles are in general use. In Illinois and, indeed, in nearly all of the States, the driving of a motor vehicle at a rate of speed faster than the limits named in the statute is prohibited, without regard to the conditions existing at the time of the violation; and it is usually provided that nothing in the act contained shall be constructed as authorizing the driving of the motor-car at a rate of speed greater than is reasonable, having regard to the traffic and the use of the highways, or so as to endanger the life or limb or injure the property of any person. It therefore follows, and properly so, that in these States a penalty may be imposed for driving a motor-car at a rate of ten miles per hour in a twenty mile district if the conditions existing make the ten mile rate unreasonably fast.

In Massachusetts, however, the statute provides that no person shall drive a motor vehicle at a rate of speed faster than is reasonable, having proper regard to traffic and the use of the way and the safety of the public, and makes the driving of a motor-car in any highway outside the thickly settled or business portion of a city or village at a rate in excess of twenty miles per hour for a distance of one-quarter of a mile prima-facie evidence that the person operating such motor-car is running it at a rate speed greater than is reasonable, etc. Similar provisions are made with reference to the thickly settled or business portion of cities and villages, turning corners, etc., where running at a rate of speed in excess of a lesser number of miles per hour is made prima-facie evidence of a violation of the law. This prima-facie evidence may be overcome by proof that the accused was not under the conditions of the highway then existing, guilty of driving his car at a rate of speed greater than was reasonable.

It must not be understood that under the provisions of the Massachusetts statute, in order to sustain a conviction, a person must be shown to have driven his car faster than twenty miles per hour in the district where driving at a rate in excess is made prima-facie evidence of a violation of the law, for the only test is that of reasonableness, and, as in Illinois, the proof need show only that the rate of speed, without regard to the number of miles per hour, was unreasonably fast.

Lincoln's Ancestral Home.

The home of the ancestors of Abraham Lincoln is still standing at Lorrane, Berks county. It is located only a few hundred yards from the Reading railway tracks, in full view of travelers, but its place in history is known to but a few. It is a humble, but substantial stone farm dwelling, about which clusters many and momentous associations.

At an earlier date than 1734 it was the home of Mordecai Lincoln, second of the name. Here was born the first American Abraham Lincoln, a grand uncle of the martyred president.

In 1638 a Norwichman of England, named Samuel Lincoln, came to America and settled at Hingham, now Plymouth county, Mass., and there lived and died. This Samuel Lincoln had a son, Mordecai, second of that name born the year after William Penn arrived in his province. This son removed to Monmouth, N. J., and thence into Pennsylvania, and settled in Amity township, Philadelphia, later Berks county, incorporated in 1752. This Mordecai Lincoln's name appeared on the list of taxables of 1734, Amity township, for 500 acres, indicating his arrival before that date and a man of estate.

IRISH PATRIOTS NEARLY RIOT

Speech in Opposition to Land Bill Started Outbreak.

MEETING IN WILD UPROAR

Delegates Yelled, Cheered and Shouted Encouragement to Disputants, and One Rushed to Platform to Assault John Redmond—Adopted the Usual Home Rule Resolution.

Dublin, Feb. 10.—The national convention of the United Irish league, attended by over 2000 delegates, which was opened at the Mansion House, under the presidency of John Redmond, was the scene, before the session closed, of an outbreak that resembled the proverbial Donnybrook fair. William O'Brien spoke in opposition to chelf secretary for Ireland's land bill. Mr. Redmond was in favor of this measure. During the controversy Eugene Grean, member of parliament from the Southeast division of Cork, rushed to the platform, apparently with the intention of assaulting Mr. Redmond. He was suppressed and hustled away, however. Then for a few moments the platform became a seething mass of angry disputants. Priests and legislators rushed into the fray and tugged at one another's collars, while the remainder of the audience yelled, cheered and shouted encouragement to the disputants.

Ten minutes or more elapsed before Mr. Redmond was able to quell the pandemonium and the business of the conference could be resumed.

Resolutions offered by the followers of Mr. Redmond in favor of home rule and Secretary Birrell's land bill, and expressing confidence in Mr. Redmond's leadership, were carried by overwhelming majorities.

It became apparent early that Mr. Redmond was in control and the speeches of the Sinn Feiners charging that the party was too friendly with the Liberals were shouted down.

The convention adopted the usual home rule resolution and declared that this question must be made a vital issue at the next general election, so there could be no misunderstanding on the other side of the channel regarding what was meant.

The convention was quickly put on good terms with itself by messages of congratulation, encouragement and good wishes from America, Australia and elsewhere.

The greeting from America contained also the news that $25,000 is now on its way and that another remittance would follow speedily.

INDIANA COUNTIES VOTE DRY

Only One Out of Fourteen Carried by the Wets.

Frankfort, Ind., Feb. 10.—In the local option election in Clinton county the temperance forces carried every township, and the aggregate majority, as shown by complete returns, is 20,055, one of the largest victories that the "drys" have yet gained in the state. The only saloon in the county will close on Saturday night.

When the returns were received the church bells were rung. The temperance forces are elated over the victory. Out of fourteen county local option elections, the "drys" have carried thirteen and the wets one.

Poor Man's Rights in County to be Tested.

Can a man be moved from one poor district to another just because he is poor? This is the question that has arisen in the case of Watson Babb, his wife and seven children, of Sugarloaf township, whom the poor board of Bloom poor district, Columbia county is trying to have removed to Sullivan county. A special session of court was held to hear arguments. Judge Evans reserved his decision.

Watson Babb moved his family from Davidson township, Sullivan county, to Sugarloaf township, Columbia county, on October 1, 1906. He secured employment and provided for his family from that time until March 1, 1907. He was then taken ill and applied to the Bloom poor district for relief. From that time until the middle of June, when he recovered, he was furnished with relief amounting to $172.29, and this amount was later refunded to the Bloom poor district.

From the time of his recovery until the present time Babb has not applied for relief, but the Bloom poor district took out an order of removal on the ground that he was likely to become a charge on the district.

Office of the Bloom poor district went to the Babb home with a wagon for the purpose of moving him, but he locked the doors and positively refused to return to his old home in Sullivan county. His attorneys maintain that he has a right to make his home where he sees fit, and the decision of Judge Evans is being awaited with much interest, as it is the first time the question has ever been raised.

A Former Bellefonte Lady Dies at Canton, Ohio.

Mrs. Belinda J., wife of William J. Fravel, died Monday morning, 10 o'clock, at the family residence, 724 North Walnut street, Canton, Ohio, in her 72 year. She was a daughter of James M. and Margaret Palmer Johnson, long residents of Bellefonte, a sister of Mrs. George Bayard, deceased, J. F. Johnson, who died a number of years ago at San Francisco, California, and Mrs. R. A. Cassidy, of Canton, Ohio, the only survivor of the family.

She is survived by her husband and sons Alfred J. employed at the Denber Watch works, Canton, and J. Norman, Assistant Chief Clerk Railway U. S. postal service, stationed at Crestline Ohio, and two granddaughters, children of the latter.

Mr. and Mrs. Fravel removed from Bellefonte to Canton in the spring of 1867 and have resided there ever since. She was a very active member of the St. Paul's Protestant Episcopal Church of Canton with which she connected herself at the formation of the parish under the pastorate of Rev. Lafferty, in 1869 who was for several years rector of St. John's Church, Bellefonte, previous to the war. Funeral services at St. Pauls Church Wednesday 2 p. m. Interment at West lawn.

Found His Friends.

The body of Patrick Hennesy who was killed on the B. E. V. R. R. at Julian on January 23rd and was buried in a few days later, was exhumed on Tuesday and sent to South Bethlehem Pa., for interment. His brother-in-laws who live there are well to do and in the hotel-business. They paid off all charges to the township and county and were gentlemen. Glad to have found their brother, which they would of never been able to do had it not been for the clever work of Walter G. Tallhelm Justic of the Peace at Julian, who took the case after the officers gave it up and traced the man through three states and located his friends. Deceased was born in South Bethlehem and was aged 42 years. He leaves his father and three sisters living at the above city. Funeral took place yesterday from the Catholic church on 3rd street at South Bethlehem. Interment in the Catholic Cemetery at that place.

Death of Herman Robb.

Word was received at this office of sudden death of our townsman, Herman Robb, who passed away at his home in this place about half past two Wednesday afternoon. He was only taken sick last Monday with an attack of la grippe.

The deceased was about 61 years of age and was a shoe maker by trade. For many years past he has been in the employ of A. C. Mingle, the shoe man. He was a life long member of the Methodist church and an honest, upright citizen. He leaves a wife and five daughters, all grown up.

WERE MAROONED FOUR DAYS

Five Women and Three Men Prisoners in Lighthouse.

THEIR BOAT WAS LOST

They Were Finally Hauled Twenty Miles Along the Beach and Across the Ice to Mainland by Life Savers. Say Next Excursion to Fire Island Will Be Made In Summer.

East Moriches, L. I., Feb. 6.—Five women and three men reached Bayshore, L. I., after spending four nights marooned at the Fire Island lighthouse. Those in the party were: Mrs. Norman Barnes and her daughter, Miss Grace Barnes; Mr. and Mrs. Lafferty, Mr. and Mrs. William McGinley, all of Bayshore; Miss Clara Barnes, of Brooklyn, and Captain Moran Hafele.

They crossed the bay to Fire island Sunday afternoon in the launch Loafer, owned by Hafele. The party reached the beach and started homeward just before darkness set in. Half a mile out the launch poked her nose into a sandbar and stuck fast. Her distress signals were heard, and the lighthouse keeper notified the life savers, who went to the rescue and landed the party at the lighthouse.

In the night a northwest gale drove the launch upon the main beach, and the cold wave froze the bay, but not sufficiently for crossing on the ice. Friends at home were notified by telephone, and the stone walls of the lighthouse, while welcome as a shelter, became rather like a prison as the days and nights passed.

Thursday a start for home was made. It involved a trip twenty miles down the beach to Smith's Point life saving station. Every four miles is a life saving station, and at each station the beach cart took the women of the party to the next station. The men walked, but walking was good, as the sand was frozen. At Smith's Point, where the bay is only half a mile wide, the life savers conveyed the party across the bay in ice scooters.

Another five miles in a farm wagon and the Mastic railroad station was reached. Those in the party say there was little suffering, but that their next excursion to Fire island will be made in the summer time.

RATE WAR FEARED

Baltimore & Ohio Believed to Be Preparing a Lower Tariff.

Baltimore, Feb. 6. — Baltimore & Ohia railroad officials are watching the eastern railroad situation carefully and are prepared to reply quickly to the Boston & Maine rate reduction. It is believed the traffic officers of the Baltimore & Ohio have a revised tariff in preparation for forwarding to the interstate commerce commission. This is intended to meet the cut of the New England road and will be in line with the Pennsylvania policy for the protection of the trade of the more southern ports and for the guarding of its own interests.

The Pennsylvania and Reading railroads now threaten to retaliate against the Boston & Maine for putting in a lower freight rate from Boston, and it begins to look as though there might after all be a little freight rate war in the east as a result of the original rate cutting.

ALLISON REMEMBERED

Senate Pays Honors Today to Memory of Deceased Leader.

Washington, Feb. 6. — The senate transacted no public business today, its time being devoted to eulogies of the career of the late William Boyd Allison, senator from Iowa, who died Aug. 4, 1908.

An unusual note of feeling ran through the addresses. They had little of the perfunctory nature generally marking the obituary exercises in the senate, as Senator Allison's long service in the upper national house and the qualities of his character commanded the respect of his colleagues. The principal address was made by Senator Dolliver, of Iowa.

WANDERED 10 MILES IN MINE

Coal Digger's Lamp Went Out and He Lost His Way.

Hazleton, Pa., Feb. 6.—John Caronsky, of Harleigh, a miner, while returning from his chamber at the close of the day's labors to the bottom of the slope to be hoisted up to the surface, met with an experience that does not often befall the underground diggers. His light was blown out by a sudden movement of air, and not being accompanied by any other men, all of his coworkers having left, he was in total darkness.

Not being well acquainted with the lay of the land, he wandered around aimlessly the entire night, trying to find his way to the foot of the gangway. He walked about the entire place, and that he did not step off into some cavern and met death is remarkable.

He estimates that he must have covered no less than ten miles. He didn't sleep a wink and was found in an exhausted condition by other miners when they went to work.

JACK JOHNSON ASKS JEFFRIES TO FIGHT

Colored Heavyweight Cables Challenge From Australia.

San Francisco, Cal., Feb. 6.—Jack Johnson cabled from Sydney, N. S. W., a challenge to Jim Jeffries to fight for the heavyweight championship of the world, the title which Johnson won by beating Tommy Burns in Sydney last December.

The giant colored man seems to have heard that Jeffries has declared

JIM JEFFRIES.

he never gave up the title and this is probably the reason he challenges Jeffries.

In his message Johnson says that he will come at once to San Francisco and demand that Jeffries fight him.

The challenge was at once forwarded to Jeffries, but the boilermaker refused to answer it positively one way or the other. He replied that he was on record now as being out of the ring and that he had not yet changed his mind. He said:

"When Johnson gets here will be time enough to think the matter over."

RACE TROUBLES STILL RIFE

Assaults on Girls By Colored Men Stir Pittsburg.

FEELING BECOMES ACUTE

Police Force In Affected Districts Has Been Doubled to Prevent a Serious Clash—Over 100 Negroes Locked Up—Aged Woman Attacked by a Negro Near Johnstown.

Pittsburg, Feb. 6.—To bring justice to the perpetrators of the many recent attacks on white women and girls in the Herron Hill, Lawrenceville and South Side districts of this city and to take steps to prevent a recurrence of the crimes the better element of the negroes have issued a call for a general mass meeting to be held next Tuesday night.

The feeling between the white people and the negroes is becoming more acute as each day brings its quota of attacks and reported attacks on white girls by negroes. The populace of the affected districts is highly wrought up over the existing situation, and only the most careful vigilance on the part of a double force of policemen prevents a serious clash between the races. Over 100 negroes have been arrested and locked up.

Blanche Smith and Rose Sesock, residing in a suburb, were attacked by negroes, but their screams frightened the assailants, who escaped. Two negroes, accused of being those who attacked the girls, were later arrested and sent to the workhouse for three months.

John Stokes, a negro, aged thirty two years, was arrested on charges preferred by Mrs. Jane Thompson, of the South Side, who alleges that he entered her home and the room of her daughter, but was frightened away by the screams of the girl.

BOY HANGS HIMSELF

12-Year-Old Lad Committed Suicide Because He Was Unappreciated.

Scranton, Pa., Feb. 5.—Elmer Schrader, the twelve-year-old son of George Schrader, a South Scranton carpenter, hanged himself under the porch of a neighbor's house, supposedly because he was unappreciated. He was of a morose disposition, refusing to play with other children, and complained constantly that he was not properly treated by his relatives and friends in general.

Mr. and Mrs. John Forchel, a newly married couple, who live at 1028 Alder street, near the Schrader home, were wont to indulge and humor the boy and pretend to sympathize with him. It was underneath the porch of their home that he hung himself.

Goats to Eat Lanes Through Forests.

Washington, Feb. 5.—The bureau of forestry has made arrangements to purchase 3000 Angora goats. They will be sent to California to eat away the underbrush and thereby protect the forests. The goats will be promptly spread out over an area and then properly guided so as to eat away lanes in the forests. These lanes, it is calculated, will be 300 yards wide and will serve to divide the forests into patches, so to speak, so that if one patch gets afire the flames will not spread to the adjoining patches.

LONGBOAT DEFEATS SHRUBB

Englishman, Eight Laps In the Lead, Collapsed In 25th Mile.

New York, Feb. 6.—Maintaining an even, swinging stride that rarely varied throughout the race, Tom Longboat, the Onondaga Indian from Can-

TOM LONGBOAT.

ada, wrested the laurels of an indoor Marathon race at Madison Square Garden when victory seemed almost within the grasp of the plucky Englishman, Alfred Shrubb, who collapsed in the twenty-fifth mile, leaving the Indian to finish the long race of 26 miles and 385 yards alone.

Shrubb led by eight laps when he collapsed. Up to the twentieth mile he ran a remarkable race and appeared to be a sure winner, until the twenty-second mile, when it was seen he was in distress. After a few sprints he fell into a walk, and Longboat increased his pace and was in the lead when the Englishman collapsed.

Longboat's time for the race was 2 hours, 53 minutes and 40 2-5 seconds, which is nearly eight minutes behind the record made by Dorando, the Italian, in his race with Johnny Hayes, the Olympic Marathon winner, last fall.

NEW YORK SPEAKER AGAINST HUGHES

Voices Leaders' Opposition to Direct Nominations.

Albany, N. Y., Feb. 6.—In an address before the New York State Lumbermen's association last night Speaker Wadsworth, of the assembly, came out strongly against Governor Hughes in the matter of direct nominations. In voicing the opposition of the Republican state leaders to the plan which the governor is advocating vigorously, Mr. Wadsworth said:

"If the party voters exercise the powers which are theirs under the present system, it is safe to assume that the nominee of the convention will represent in a great majority of instances the sentiments of a great majority of his party. In a direct primary election, however, no such percentage is necessary to success; a mere plurality may be sufficient.

"Effective fusion between two parties is practically impossible under direct nominations. When you establish direct primaries you had better make up your minds to say goodby to the custom of re-electing faithful judges without opposition, and you may as well prepare to see the judiciary thrown into politics to just such a greater degree.

"The greatest of the practical objections, however, is the question of expense—not so much the expense to which the public would be subjected by having two elections a year and the consequent disturbance of business, but rather the expense to which the candidates will be subjected. It is already proved that in those states which have established this system a poor man cannot hope to remain in public life."

CANAL WORK PLEASES TAFT

Gave Out Statement Before Sailing From Colon.

ENGINEERS PREPARING REPORT

The President Elect Says the Work Is Progressing In a Most Satisfactory Way—Accompanied by Special Engineers, He Visited Every Section of the Canal.

Colon, Feb. 8.—President Elect William H. Taft and party left here on board the United States cruiser North Carolina for New Orleans, accompanied by the cruiser Montana. Just previous to embarking Mr. Taft gave out the following:

"I am not prepared now to make a statement as to the results of the trip to the isthmus except to say that we have found the work progressing in a most satisfactory way; the organization better than ever before; the esprit de corps excellent and the determination of all, even the humblest laborer directed to the building of the canal. I am sure this has impressed itself upon every one of the board of visiting engineers as it has upon me.

"With reference to the type of the canal and the continuance of the present plans, the engineers promise that they will be able to hand me their report by the time we land at New Orleans."

Governor Melendez and a large gathering of the Panama railroad and the isthmian canal commission employes were present at the dock to bid the president elect farewell. Lieutenant Colonel Goethals, chief engineer of the canal, accompanied Mr. Taft on the North Carolina. He will proceed to Washington to discuss the matter of appropriations necessary for the completion of the work.

As the tug which transferred the visitors to the cruiser moved away the crowd cheered lustily. Mr. Taft, looking the picture of health, bowed and called out, laughing: "Keep your eye on the subterranean lake at Gatun."

During his visit here, which lasted ten days, Mr. Taft, accompanied on many occasions by the special engineers who came to the isthmus with him, visited every section of the canal. His influence was exerted also in bringing about a better feeling between various factions that have been opposing each other since the last election.

ARTHUR P. DAVIS.
Head of Board of Civil Engineers Accompanying Mr. Taft.

WHAT CANAL IS COSTING

Hugh Weir Says $1200 Is Spent Every Minute For Labor.

Toledo, O., Feb. 8.—For the education of one girl and because the state law required it, the school directors of District No. 6, in Ross township, Mich., were compelled last fall to repair and reopen a school, buy fuel and other supplies and engage a teacher.

Inspectors of Ross and Richland townships held a meeting in Richland for the purpose of voting No. 6 district out of existence and dividing the territory among other districts.

They were blocked, however, by their contract with the teacher, which holds good till the end of the school year.

In view of this situation, they decided to continue to keep No. 6 going until the end of the school year and then make the change.

BIG SHIP NAMED FOR LITTLE STATE

Delaware, New Dreadnought, Launched Today.

TO BE OUR LARGEST WARSHIP

She Will Displace Twenty Thousand Tons of Water and Make Twenty-one Knots—Named by Daughter of State, Surrounded by State's Officials and Prominent Men—Sister Ship of the North Dakota.

Newport News, Va., Feb. 6.—Bearing the name of the next to the smallest state of the Union, the Delaware, the largest battleship of the United States, was launched here today. She shares with her sister ship, the North Dakota, recently launched at Fore River, Mass., the honor of being the first American Dreadnought.

Standing sponsor for the Delaware was Miss Anna P. Cahall, a daughter of the state for which the new ship is named. She is a resident of Bridgeville, Del., and a niece of Governor Pennewill, of Delaware. Assisting Miss Cahall in the task of smashing the bottle of champagne and naming the huge hull was Miss Hazel, of Dover, Del., a niece of Mrs. James Pennewill, sister-in-law of the governor.

Despite the agitation of the temperance societies of Delaware to have the state's namesake christened with water, the customary bottle of champagne played its usual sacrifical part in the launching of the Delaware.

State's Leading Men Present.

Governor Pennewill, his brother, Judge James Pennewill; Delaware's representatives in the national legislature and the members of the state legislature, as well as a large number of prominent citizens of Dover, Wilmington and other places, were present to see the battleship take the water.

When completed the Delaware will be a first class armored battleship of 20,000 tons displacement. Her general dimensions are as follows: Length over all, 518 feet 9 inches; beam, 85 feet 2 inches; depth, 44 feet 6 inches. Her main battery will consist of ten twelve-inch guns mounted in pairs in turrets. She will be propelled by twin screws driven by two four-cylinder triple expansion engines capable of sending her through the water at a twenty-one knot gait. She will cost almost $4,000,000.

Qualtrough, of the battleship Georgia, on a charge of intoxication at Tangier during a reception given there by the American minister, Samuel F. Gummere, and which were presented to Rear Admiral Sperry, commander-in-chief of the Atlantic battleship fleet, were approved by the rear admiral and forwarded to Washington.

The findings were not made public here, but it is stated with certainty that Captain Qualtrough was not acquitted. It is believed, on the contrary, that the findings are of so grave a nature that he will not be restored to duty. The rumor is abroad in the fleet that should the findings be approved by the navy department at Washington, Captain Qualtrough will be disgraced and possibly dismissed from the service.

It was learned that Lieutenant Commander George W. Kline will be in command of the Georgia for the voyage home from this port.

A TYRANT'S MEASURE.

We cannot believe the State Medical Society fully appreciates the tyranny of the bill presented in the Legislature in its behalf. Neither can we believe the legislators or the people of this State will ever countenance such an attack upon their liberties.

This so-called "singe board" bill provides for the criminal prosecution of every person who "practices medicine" without a certificate from the "board." It then declares that every person "practices medicine within the meaning of this act" who "shall offer or undertake, whether with or without drugs, medicines or instruments, and whether with or without fee therefor, by any means or method to diagnose, treat, operate upon or prescribe for any human disease, pain, injury, deformity or physical condition.

This monstrously tyrannical measure thus proposes to prohibit "first aid to the injured," under penalty of fine and imprisonment It proposes to punish the good Samaritan who would hold "Smelling salts" to the nostrils of a fainting woman. It provides a penalty for the father who administers the steam of vinegar to relieve his croupy child until the doctor arrives.

In short, this bill provides condign punishment for the old lady who suggests a drink of catnip tea to a complaining neighbor, and for the man who advises his office associate to visit a chiropodist when his corns hurt. It is such a monstrous interference with personal liberty that if it was not urged by so powerful a body it would be supremely ridiculous.

Before the time of Aesculapius the "practice of Medicide" was an adjunct to priestly offices. Ever since then it has carried some of its air of mystery, along with the dictum that "desperate cases require desperate remedies." The profession has not frowned upon the frequent assertion that a "regular" potion administered would "either kill or cure." Yet, withal, the medical profession has enjoyed a large measure of the confidence and respect of the plain people.

There are charlatans who live and thrive upon that confidence and respect. No doubt our medical friends well tell us this bill of theirs is aimed at that class. If so it is a poor blunderbuss. It does not strike where it is aimed. The most dangerous charlatans are those who practice their arts under the protection of medical college diplomas and who are capable of passing the examination prescribed by a medical board. They are men of good medical training who elect to throw professional ethics to the winds and engage in fraudulent practice.

This medical bill for the "protection of the public" will not protect. It has no power to deter the charlatan described, though it confers power to convict the honest druggist who recommends arnica to the barefoot boy with a stone bruise on his heel. It provides no restraint upon the regular accredited medical practitioner who prescribes a proprietary formula, but it would condemn the man who advises his friend to use ——'s liniment for a sprain, or oils of tar and pennyroyal to prevent mosquito bites.

While this paper is and has been the friend of the great army of reputable physicians who practice to alleviate the sufferings of humanity, it cannot accept this bill. Though we fully appreciate the necessity for protecting the public against charlatans and pretenders, we do not deem it wise, proper or humane to make the doing of good illegal.

This bill, if enacted, would negative, for example, the painstaking instruction of railroad employes in this district in the art of rendering first aid. It would consign to punishment the brakeman who assumed to diagnose the injury of his fellow as having a leg ground off, and impose upon him a penalty for binding upon the injured limb a tourniquest to stop the flow of blood.

What nonsense? what arrogance? No such brutal cruelty is born of the true spirit of that highest profession whose mission is the alleviation of human suffering! —The Pittsburg Dispatch.

THE LOW GRADE DECISION

It was perfectly natural for farmers living along the Pennsylvania Railroad's low grade line in Lancaster and Chester counties to make an effort to get a passenger service. As they pointed out in their petition to the State Railroad Commission such a service would make it easier to market their milk and other products, and this in turn would increase the values of their farms.

Nevertheless, when the matter is examined in its broadest aspect, it is apparent that it was fortunate that the commission found nothing in either existing conditions or the laws of the State which prevented it from recommending that the request of the farmers be denied. The low grade line is important to the stockholders of the road in that it makes possible great economies. It is important to shipping interests, because it materially cuts down the time of transit of a vast freight traffic. And it is also important to the traveling public and the people who work on the railroads for the reason that it lessons the danger of wrecks. And this public is numerically so great that its interest greatly outweighs that of the few farmers who petitioned for trains.

Experts say that one of the possible solutions of the problem growing out of the rapid increase in traffic on the great trunk lines is to have each of them consist of two distinct railroads so separated that entirely different systems of signals, train running and other details could be maintained if need be. The Pennsylvania has gone further in the development of this idea than any other American railroad and it should be permitted to continue unmolested until something definite is known about its value or lack of value.

GREEN shoes will be stylish this spring for both men and women. The tailors at least will wear them. They could almost become malefactors of great wealth by persuading men to wear colors.

CONGRESS feels it has done a big thing in tabling parts of the President's message. This is no more however, than it did last year when it pigeonholed the majority of his important recommendations.

SENATOR FORAKER again evokes the ghost of Brownsville, with his charge of money illegally spent on this investigation. It would be worth far more to Uncle Sam than the $15,000 spent in detective work, if he could really find out just who were the sportive gents present at that festive soiree.

Are our merchants prepared to meet the competition, constantly growing stiffer, of those alluring spring catalogues from the metropolitan department stores? Of course the bargains at home are better, when you consider that in our own shops you get more personal attention and a better chance to return unsatisfactory goods. But the public forgets this. Trade has to be drummed, and the only efficient drummer is a live newspaper.

THE hungry Democrats are furtively storing away the many crumbs of political capital that are falling from the quarrelsome congressional table. In view of the inability of the Democrats to construct and adhere to any political issues of their own, this is charitable on the the part of the Republican majority but unnecessary.

How long, O Congress, how long will you continue the farce of free seeds to farmers? The farmer understands perfectly that the seeds are sent out by the congressman to flatter his constituents to make them believe that he remembers them. The farmer would rather buy his own seeds than be taxed for this cheap form of electioneering.

A Wilkes-Barre man spent twenty dollars to find out the name of the one citizen who voted for him at the primaries as a candidate for councilman, only to discover that the returns were erroneous and that he had not received a single vote. That was a disappointment heavy enough to make even a Wilkes Barre man swear.

A broker has been suspended from the New York stock exchange for indulging in improper remarks on the floor of the exchange. Robbing the people is a trifling offense compared with saying things which jar the members, according to the exchange governors.

EDITOR BAILEY, of the Johnstown Democrat, continues to aim sledge hammer blows at about everything from President Roosevelt down to the man who refuses to clear the snow from his sidewalk. But the hammer never does any damage.

THE citizens of counties through which the state automobile speedway would be constructed are organizing to forward the movement What are the citizens of other counties who will have to pay the cost of this highway doing?

HARVARD astronomers think there may be another planet outside of Neptune. The builders of those new sky-scrapers in New York should have its course properly marked by buoys and fog whistles.

WE miss one familiar note in our exchanges, that of the annual failure of the ice crop. Isn't the ice trade forgetting one periodical feature of its advertising?

Women Who Esteem Pe-ru-na Highly

Mrs. Gray, of Wisconsin.
Troubled with catarrh of the head and throat for many years.

Miss Johnson, of New York.
Had a bronchial trouble for some months, and chronic sore throat.

Miss Bougard, of Brooklyn.
Was afflicted for two years with catarrh of the throat.

Mrs. O'Byrne, of Kansas.
Has used Peruna in her household a good many years.

Bronchial Trouble.

Miss Harriet Johnson, 124 Lark St., Albany, N. Y., writes:

"I had bronchial trouble for some months and nothing did me any good until I took Peruna, which I took for three months. I felt in much better health in every way after I had used it six weeks.

"My throat had always been an annoyance to me, and each cold would aggravate the trouble, but since I took Peruna I have not had a bit of trouble with my bronchial tubes, and as this was many months ago, I feel that it will not return."

Catarrh of Head.

Mrs. J. M. Hitchcock, Newport, Wash., writes: "I must now tell you how well I am, and thank you for your kind advice and the interest you have taken in me.

"My ears are entirely well. My head feels better than it had for years before. I don't have headache any more and my eyes are clear and bright, and I feel that my health is better in every way. The disagreeable symptoms were all gone before I had taken Peruna three weeks.

"I will answer any letters that may come to me. Peruna was a great help to me, and if I can be the means of helping any one else I will try and do what I can."

Those who object to liquid medicines can now obtain Peruna Tablets, which represent the solid medicinal ingredients of Peruna.

MRS. LENA O'BYRNE.

Mrs. Lena O'Byrne, 626 Madison St., Topeka, Kan., writes:

"We have used Peruna in our household for a good many years. I took it for a cough and a tonic. My husband used it and thinks there is nothing like it for hay fever, from which he suffered for years.

"I also give it to my children for coughs and colds, and my daughter, Mary, was cured of catarrh of the head by Peruna. It certainly is a medicine of unquestioned merit."

Head and Throat Now Clear.

Miss Maud Bougard, 260 12th St., Brooklyn, N. Y., writes: "I was afflicted for two years with catarrh of the throat. At first it was very slight, but every cold I took made it worse.

"I followed your directions, and in a very short time I began to improve. I took one bottle and am now taking my second. I can safely say that my throat and head are cleared from catarrh at the present time, but I still continue to take my usual dose for a spring tonic and I find there is nothing better.

"Words cannot express how thankful I feel for my cure, as I did not know the comfort of a good night's sleep till now. I was continually bothered with my breathing. I could scarcely breathe through my nose at all. But now I go to bed and sleep the whole night through without any trouble."

"A Healthy Woman To-Day, Thanks to Pe-ru-na."

Mrs. L. A. Gray, 137 Main St., Menasha, Wis., writes:

"I was troubled with catarrh of the head and throat for so many years that I thought there was no cure for it, and that I would have to go on suffering to the end of my days.

"When I caught cold my head and throat would be so stopped up that I could hardly breathe, and there was a dropping in my throat which was very nauseating, and made my breath bad and my stomach all out of order.

"Mother suggested that I try Peruna, as she knew of some people who had used it with beneficial results.

"I bought a couple of bottles and decided to see what it would do for me. I did not take many doses before I knew I had the right medicine, and am pleased to say that in less than two months all the catarrh was gone.

"I am a healthy woman to-day, thanks to Peruna."

The Apostles imprisoned.—Acts 5, 17-42.

Golden Text—Blessed are they which are persecuted for righteousness sake; for theirs is the kingdom of heaven. Matt. v.10.

Verses 17-18—If a child of God finds himself in prison which is the better thing to do; fret and worry about it, or be glad and rejoice?

If a good man is in prison is that the best place for him for the time?

Can an enemy, or circumstances, or his ignorance, or any other power, other than personal sin, put a Christian in a position, where his highest interests are not being served to the utmost possible? (This question must be answered in writing by members of the club.)

Verse 19—By what method did God release the Apostles from prison?

Does God in these days ever adopt similar methods, to release his servants from prison, and did he always adopt that miraculous method in those days? (See case of Jesus and John the Baptist.)

May a Christian in prison today, be absolutely sure of his release, if that is necessary for the accomplishment of his work?

Verses 20-21—Does God now give us direct, and specific, instructions as to our duty, when that is necessary?

Should a Christian always testify in God's Temple when he has the opportunity; or should he wait for special instructions from God?

Verses 22-25—Is it all possible that any power can prevail against God, or those in the care of God?

Does God sometimes require us to run the risk of our lives, as these apostles were doing?

Verses 26-28—From the time of Jesus until now, which class of men have most opposed the advance of supernatural Christianity, the people or the priests?

What were the priests afraid would result from the teaching of the Apostles?

Will a true man of God, preacher, or layman, ever be angry at the teaching of any sincere religious teacher, no matter what the doctrine taught?

What is the proper attitude to take, to all religious teachers?

Verse 20—Is the voice of the church the voice of God, or has it ever been so?

What, or who in the last analysis, is the final authority to a human soul?

Verses 30-32—Is there any power, or authority or threat, which can prevent a man who is ashamed of God, from boldly witnessing for God?

What is the witness to Christians today, of the reality of Christ's death, resurrection and ascension, and of the forgiveness of sins, and life everlasting?

Verse 33—When the holy (?) heretic persecutors get evidence that their victims are right, and that they are wrong, are they glad or mad?

What was it, that "cut" these priests "to the heart" when it should have made their hearts jump for joy?

Verses 34-40—What is the better way to treat heresy, to let it alone, or oppose it?

Is it not true that the heretics of one generation have been the saints of the next?

Who and what was this man Gamaliel?

How would you characterize Gamaliel's great defence of the Apostles?

Verses 41-42—Is it as wise for us as it was for the Apostles, to rejoice when we suffer for Jesus' sake?

What is the daily duty and privilege of a Christian?

Several men who were working at the clay banks of the Howard Brick company had a narrow escape from injury last Thursday. They were engaged in removing the strippings from the banks and were at work at the bottom of the banks loading onto cars a portion of the strippings that had fallen down when a large rock that had been loosened by the rain and thaw slid down But for the timely warning of Manager H. A. Moore, who was there at the time and saw the rock start to slide, the men would have been caught by the fall.

The borough council held only a brief session on its last meeting night, there being only a few matters of routine business to come before the body.

Borough politics is attracting more than usual interest this spring on account of several local issues that will likely engage the attention of our citizens following the election and organization of the new council. A number of the residents are agitating the lighting of the streets by electricity. Others contend that the borough should have a sewerage system. It is thought that many of the taxpayers who formerly opposed the street lighting project will now support it to overcome the agitation for sewers which improvement they think would incur an indebtedness to great for the borough to bear.

The several schools of the borough will observe the one hundredth anniversary of the birth of Lincoln on Friday. An elaborate and fitting program is being prepared in the high school and will consist of orations, essays, recitations, songs and a debate, The question, "Resolved that Lincoln deserves more honor than Washington," is an oft debated one but was considered especially appropriate for this occasion. The other schools will also commemorate the memory of the preserver of the nation.

As soon as possible the tool works will be started and later on it is the intention to have the whole plant in operation. It is hoped that this report may be verified in every respect as it gives employment to a large number of men and will be a great benefit to the town in many ways.

What a splendid type of tireless activity is the sun as the psalmist describes it issuing like "a bridegroom from his chamber and rejoicing like a strong man to run a race." Every man ought to rise in the morning refreshed by slumber and renewed by rest, eager for the struggle of the day. But how rarely this is so. Most people rise still unrefreshed, and dreading the strain of the day's labors. The cause of this is deficient vitality and behind this lies a deficient supply of pure rich blood and an inadequate nourishment of the body. There is nothing that will give you more strength and energy, as will Dr. Pierce's Golden Medical Discovery. It does this by increasing the quantity and quality of the blood supply This nourishes the nerves feeds the brain builds up enfeebled organs, and gives that sense of strength and power which makes the struggle of life a joy. The "good feeling" which follows the use of "Golden Medical Discovery" is not due to stimulation as it contains no alcohol. The ingredients are plainly stated on the bottle-wrapper The ingredients are plainly stated on the bottle-wrapper. It does not "brace up" the body, but builds it up into a condition of sound and vigorous health.

A Great Year for Autos.

There will be more cars made this year than ever before, more sold than ever before, better cars will be made than ever before. And the dominating feature of this great year is the appearance in the market for the first time of really high grade cars at a low price—cars with four cylinders that will go as fast as any one wants to ride, as far as any one wants to go, that carry five passengers in comfort, and look as well as the highest-priced cars look.

Heart Troubles

The heart may be weak just the same as the eyes, stomach or other organs. It often happens that a person is born with a weak heart. Then again disease, fevers, over-exertion, anxiety, nervousness, rheumatism, etc. weaken the heart. The result is shortness of breath, palpitation, pain in the heart, or in some of the nerves of the chest or abdomen. The heart should be strengthened with a tonic, and for this nothing equals Dr. Miles' Heart Cure.

"I had LaGrippe last fall as I thought in a mild form. I was weak, tired feeling, and short of breath; could hardly go about, and a good deal of the time sort of an asthmatic breathing and extremely nervous. I began taking Dr. Miles' Heart Cure and Nervine and now I feel so much better in every way. I am so thankful that I began taking this medicine, and shall not hesitate to tell others how much good it has done me."

The Knock-out Blow.

The blow which knocked out Corbett was a revelation to the prize fighters. From the earliest days of the ring the knock-out blow was aimed for the jaw, the temple or the jugular vein. Stomach punches were thrown in to worry and weary the fighter, but if a scientific man had told one of the old fighters that the most vulnerable spot was the region of the stomach, he'd have laughed at him for an ignoramus. Dr. Pierce is bringing home to the public a parallel fact; that the stomach is the most vulnerable organ out of the prize ring as well as in it. We protect our heads, throats, feet and lungs, but the stomach we are utterly indifferent to, until disease finds the solar plexus and knocks us out. Make your stomach sound and strong by the use of Doctor Pierce's Golden Medical Discovery, and you protect yourself in your most vulnerable spot. "Golden Medical Discovery" cures "weak stomach," indigestion, or dyspepsia, torpid liver, bad, thin and impure blood and other diseases of the organs of digestion and nutrition.

The "Golden Medical Discovery" has a specific curative effect upon all mucous surfaces and hence cures catarrh, no matter where located or what stage it may have reached. In Nasal Catarrh it is well to cleanse the passages with Dr. Sage's Catarrh Remedy fluid while using the "Discovery" as a constitutional remedy. *Why* the "Golden Medical Discovery" cures catarrhal diseases, as of the stomach, bowels, bladder and other pelvic organs will be plain to you if you will read a booklet of extracts from the writings of eminent medical authorities, endorsing its ingredients and explaining their curative properties. It is mailed *free* on request. Address Dr. R.V. Pierce, Buffalo, N. Y. This booklet gives all the ingredients entering into Dr. Pierce's medicines from which it will be seen that they contain not a drop of alcohol, pure, triple-refined glycerine being used instead.

Dr. Pierce's great thousand-page illustrated Common Sense Medical Adviser will be sent free, paper-bound, for 21 one-cent stamps, or cloth-bound for 31 stamps. Address Dr. Pierce as above.

People Will Talk You Know

And that's the reason why Dr. Pierce's Family Medicines are advertised so little now-a-days. They have made hundreds of thousands of cures in the past 40 years, and some of the grateful people whom they have restored to health are to be found almost everywhere. There's scarcely a hamlet that don't contain some. Look them up. Interview them. They are living, walking, active advertisements

For Dr. Pierce's Family Medicines.

You can believe your neighbors. Therefore ask them. What *cured them* will very likely *cure you*, if similarly afflicted—only give them a good, *fair* trial.

It's a good, sound, common sense policy to use medicines only of KNOWN COMPOSITION, and which contain neither alcohol nor habit-forming drugs. The most intelligent people, and many of the most successful, conscientious physicians, follow this judicious course of action. The leading medical authorities, of all schools of medicine, endorse the ingredients composing Dr. Pierce's medicines. These are plainly printed on wrappers and attested under oath. There's no secrecy; an open publicity, square-deal policy is followed by the makers.

We have a profound desire to avoid all offense to the most delicate sensitiveness of modest women, for whom we entertain the most sincere respect and admiration. We shall not, therefore, particularize *here* concerning the symptoms and peculiar ailments incident to the sex for which Dr. Pierce's Favorite Prescription has for more than 40 years proven such a boon. We cannot, however, do a better service to the afflicted of the gentler sex than to refer them to Dr. Pierce's Common Sense Medical Adviser, a great family doctor book of 1000 pages, bound in cloth and *given away gratis*, or sent, post-paid, on receipt of 31 one-cent stamps—to cover cost of mailing *only*, or 21 cents for paper covered book. All the delicate ailments and matters about which every woman, whether young or old, single or married, should know, but which their sense of delicacy makes them hesitate to ask even the family physician about, are made plain in this great book. Do You Get Up With a Lame Back?

Kidney Trouble Makes You Miserable.

Almost everyone knows of Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy, because of its remarkable health restoring properties. Swamp-Root fulfills almost every wish in overcoming rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night.

Swamp-Root is not recommended for everything but if you have kidney, liver or bladder trouble, it will be found just the remedy you need. It has been thoroughly tested in private practice, and has proved so successful that a special arrangement has been made by which all readers of this paper, who have not already tried it, may have a sample bottle sent free by mail, also a book telling more about Swamp-Root, and how to find out if you have kidney or bladder trouble. When writing mention reading this generous offer in this paper and send your address to Dr. Kilmer & Co., Binghamton, N. Y. The regular fifty-cent and one-dollar size bottles are sold by all druggists. Don't make any mistake but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

The Record in Bellefonte is a Unique One.

If the reader has a "bad back" or any kidney ill and is looking for relief and cure, better depend on the only remedy endorsed by people you know. Doan's Kidney Pills relieve quickly—cure permanently. Bellefonté citizens testify to this. Here is a case of it:

Mrs: Emma J. Davis of E. Logan St. Bellefonte, Pa. says; I have a great deal of confidence in Doan's Kidney Pills, and have already recommended them in a published testimonial in 1897. I told how I had been relieved of kidney complaint and backache which had kept me suffering for years. Doan's Kidney Pills did this for me when other remedies had failed. Whenever I feel any symptom of my old trouble I send to F. Potts Green's drug store for a supply of Doan's Kidney Pills and it never requires more than a few doses to get me right."

ATTACK JOHN D.'S SON-IN-LAW

Columbia Professor Assaulted by Crazy Man on Liner.

EACH OF HIS CHEEKS BITTEN

Five Men Pounced on Athletic Foreigner to Prevent Further Injury to Rev. Charles A. Strong — Twisted His Nose to Make Him Break His Grip.

New York, Feb. 8.—Among the passengers of the North German Lloyd steamship Barbarossa, from Naples, which has arrived in port, was a tall, athletic young Brazilian, Louis Leite, who spent most of his time on the voyage romping with the children of his fellow passengers, playing checkers with great skill and arguing, during the smokingroom discussions, that international peace is bound to supersede notions of war.

On Saturday afternoon, while the Barbarossa was approaching New York, the Brazilian suddenly attacked Rev. Charles Augustus Strong, professor of psychology at Columbia university, who was the husband of Elizabeth Rockefeller, eldest daughter of John D. Rockefeller.

Dr. Strong was thrown to the floor of the smokingroom and was saved from serious injuries only by the combined efforts of a big San Franciscan and four stewards, who twisted Leite's nose and bent his wrists to make him break his grip on the Columbia professor.

Leite managed to pinion Dr. Strong's arms and bite both of his cheeks.

The doctor arose pretty much shaken but little injured. Each of his cheeks showed the marks of Leite's teeth, and the professor's ears showed marks of the mauling. His eyeglasses also were broken.

Half a dozen passengers asked Leite why he had attacked Dr. Strong. He answered quietly and pleasantly:

"That man has been following me about for a year and a half, trying to poison me. He put poison in the food I ate on this ship, but I discovered it in time. He goes against my stomach. I can't stand him."

Captain C. von Bardeleben, of the Barbarossa, ordered Leite to his stateroom, and subsequently, fearing he might attempt to throw himself out of the porthole of his stateroom, sent him to the ship's hospital, where the ports were barred. It is said he is insane.

JOHN D. TO THE FARMERS

Pertinent Question, He Says, Real Fruitage of Their Work.

Augusta, Ga., Feb. 8.—John D. Rockefeller was the honor guest at a barbecue dinner given by the Beech Island farmers. He made a short speech, in which he said that he was no farmer, but that his people, as far back as he could remember had been. He said that the farmers during his forefathers' time were not like the farmers of today, that they went after the business in a haphazard kind of way, and then he went on to say:

"I believe the thing the farmers most need is good roads. It will save them much. You will save in hauling and also in the length of the life of your stock.

"But after we get through with farming or railroading, or whatever our task in life may be, it will come to us after we have finished our work and have handed it down to our children—what was the fruit of our work—what was the real fruitage?"

Mr. Hudson left his apartments at the Houston hotel early in the day, and when he did not return a search was instituted, which led to the discovery of the body. M'ATEE FOUND NOT GUILTY

Mahanoy Plane Boy Acquitted of Burglary Charge.

WAS CHEERED BY CROWD

Pennsylvania Lad Overwhelmed With Congratulations of Home Friends In New York When Cleared of Charge—Arrest Caused a Sensation.

New York, Feb. 4.—It took a jury in Judge Rosalsky's court just thirty-five minutes to acquit Thomas McAtee, the young man from Mahanoy Plane, Pa., who was charged by former County Detective Edward J. Reardon with attempting to burglarize the latter's apartment in Waverly place.

As soon as the verdict was read and the defendant discharged, McAtee's friends from home, including his sweetheart, Miss Katherine McLaughlin, and the priest of his parish, Father Hogan, who had been in almost constant attendance at the trial, gathered around their fellow townsman and overwhelmed him with their congratulations, while cheers were given by the crowd waiting in the corridor outside the courtroom.

When McAtee, surrounded by his friends and townspeople, reached the street, there was another demonstration in his favor by persons outside the courthouse.

Most of the Mahanoy Plane delegation returned to their home town to prepare a civic reception for McAtee.

Arrest Caused Sensation.

It would have been difficult to create a greater sensation in Mahanoy Plane than followed the news two months ago that Thomas McAtee had been arrested in New York for burglary. The young man was known to nearly every one in the place, and everywhere his reputation was the best.

Father Hogan, of the Church of the Holy Rosary, of that place, immediately enlisted his services in the movement to bring about the boy's release. Patrick McAtee, the prisoner's father, at once came to his son's support. Miss Katherine McLaughlin, the fiancee of McAtee, who is teaching school at Vanhiseville, N. J., came to New York and assured her sweetheart of her support at the trial.

And when the trial came, in addition to the relatives of the accused, there were present leading men in business from McAtee's home town, and men prominent in politics, all of them willing to testify to the boy's good character and to their belief in his innocence of the crime imputed to him.

IGNORES HUSBAND IN WILL

Connecticut Man Blocked Wife's Suit For Divorce and an Appeal to the Supreme Court Was Being Prepared When She Died—He May Contest the Will.

Hartford, Conn., Feb. 8.—The will of Mrs. Mary B. Snow, who died in this city on Jan. 19, was offered before Judge Waldo Marvin in the probate court.

To the husband is given only what the law provides. The residue of the estate, which is valued at about $50,000, is left for the care and maintenance of Mrs. Snow's horses and dogs. The will was drawn in 1900.

At that time Mrs. Snow owned thirty dogs and seven horses, and it was her intention that her estate should be used entirely for the care of these animals.

A trust fund of $32,000 is set aside for the care of the horses, who are to be turned over to William Putnam, of Boston. He is to pay James Moriarity, Mrs. Snow's coachman, $1500 a year as long as any horse survives, and $900 annually after the last one dies.

The sum of $10,000 is left to Miss Phila C. Miner, of Orange, Mass., to be used in caring for the dogs. At the death of the last dog the sum will go to Miss Miller.

All but one of the horses have died since the will was drawn, and only ten dogs are now alive.

Mrs. Snow was the daughter of P. B. Francis, of Brattleboro, Vt., and in early life was married to Dr. Henry P. Duclos, who was connected with the Hartford Life & Annuity Insurance company.

In the early part of last year she brought suit for divorce against Dr. Snow. He contested the suit and the court decided in his favor.

Mrs. Snow gave notice of an appeal to the supreme court, and the record of the case was being prepared for the printer when the clerk of the court learned that Mrs. Snow had died on Jan. 19.

It is expected that Dr. Snow will contest the will.

THE PRESIDENT STANDS PAT

Reiterates His Opposition to Restricting Secret Service.

BENEFITS ONLY CRIMINALS

Mr. Roosevelt Declares If the Government Is to Act With Efficiency Against Evil Doers It Must Have Force of Detectives to Act Against Them Anywhere.

Washington, Feb. 4.—Declaring that "if the government is to act with full efficiency against criminals, it must have some force of secret service agents who can act against criminals anywhere," President Roosevelt, in a statement made public from the White House, emphatically reiterated his opposition to restricting the field of usefulness of the secret service.

"The position of the administration is," said the president, "that it is against sound public policy to discriminate in favor of criminals by discriminating against the use of the secret service to detect and punish them."

The statement was called forth by "misleading statements appearing in some of the afternoon papers" to the effect that the work of the secret service has not been hampered and that the investigation of cases outside the detection of counterfeiters and the protection of the president has not been circumscribed by restrictive legislation at the last session of congress. The president in part said:

"Under the limitation it became impossible to use these investigators in the class of cases in which they have been conspicuously successful for many years. The phraseology of the restrictive legislation is such that any person who was employed in or under the secret service division during 1909 for even so short a period as an hour became disqualified for promotion or employment in any branch of the government service where either his compensation or expenses would be payable from any appropriation in the sundry civil act.

"The limitations tied the hands of the secretary of the treasury and made it impossible for him to continue the employment of these men in any cases of irregularities or wrongdoing in those branches of the treasury department devoted to the issuing, redemption and handling of the obligations, securities and coins of the government.

"It is the contention of the executive branch of the government that it should be permitted to use the best means of investigating criminal cases; and when legislation is enacted that deprives the executive branch of a particularly desirable and effective investigating force, the government's interests, which are the interests of the people, are injured, and the only gainers are the evil doers, who may thereby escape detection and punishment."

American Lime and Stone Company's Water System.

Several months ago we noted the action of the American Lime and Stone company in beginning work building a private water system for supplying water for all purposes to their various plants. Having secured the water rights in the gap north of Coleville as well as building a reservoir they began work on same on October first and have the system completed and ready for the turning on of the water by January first. This included the building of a good sized dam and a reservoir 30x80 feet and 30 feet deep, with a capacity of one million gallons, as well as the laying of a four inch pipe feed pipe from the dam to the reservoir and a four inch pipe from the reservoir to their different quarries, seven across to Armor's Gap, or about two miles of pipe all told.

They have been using the water from this system for several weeks and find that the supply will be great enough for all their uses, while their plant is located so high up on the mountain that after being piped through hollows and over hills to Armor's Gap they still have sixty pounds pressure, or enough to afford good fire protection, if needed. In addition, it is soft, mountain water and very much better for boiler uses than the hard limestone water they had heretofore been using.

Academy Wins.

The Academy basket ball five won another signal victory Friday night in the Y. M. C. A. gymnasium by defeating the Clearfield High School team by the score of 58 to 21. The game was a very exciting one, the visitors putting up the strongest defense of any team the Academy has thus far met.

A large crowd witnessed the sport and were much pleased with the good feeling prevailing throughout the game. The Clearfield boys are a clever and a gentlemanly set of players.

The line up:

Sunbury Lady Seeks Correspondent.

Spokane, Washington, Feb. 5th.—Former Governor Albert E. Mead, who, stepped out of office as chief executive of the commonwealth of Washington, a few days ago, officiated in various capacities and granted many favors during his administration, but the climax was reached when a young woman of prominent family at Sunbury, asked him in a letter to find a correspondent for her. The writer says she is a native of southern Maryland and has lived most of her life in West Virginia, as she puts it. While Mr. Mead is not asked to act as a match-maker, he looks upon the commission as a sort of advance agent for Dan Cupid. The letter closes with these words:

"I have read much of your wonderful country, and I ask if you will find a correspondent for me. I have no matrimonial intentions. Hoping you will remember Priscilla and how honestly John tried to serve Miles Standish, you will be prompted to do your best for me."

Mr. Mead will furnish the name of his fair petitioners to anyone interested, provided the applicant can furnish the proper credentials.

Forty Horses Burned.

A large barn near the Riverview cemetery in Northumberland, rented by John Noaker, on the outskirts of town, was entirely destroyed by fire Tuesday evening. A house nearby occupied by David Fisher and owned by Charles Boyer, although saved from the flames, was very badly damaged. The town was shocked to hear that 40 horses had been destroyed. They were somewhat relieved when informed that the horses were of wood, being the principal features of the merry go-round that had been running on the island in recent years. The loss however, on the merry-go-round alone was $1,100.

A cow and a calf belonging to Mr. Noaker were saved together with a driving horse belonging to Calvin Propst of Northumberland.

The flying horses were the property of Mr. Propst who is an employ of the Pennsylvania railroad. His loss is all the more unfortunate because he made the investment in the merry-go-round from his savings.

Don't Forget the Academy Minstrels.

Don't forget to lay your plans to attend the Academy minstrels on Tuesday evening Feby. 23, in Garmans opera house.

The remarkable and supervising success of the Academy boys last year should induce every one who is fond of pretty music sung in a chorus of 40 trained voices and in solos, to patronize their performance this year you are not only guaranteed a musical treat, the music being prettier than ever, but there will be plenty of wit and humor to give you a hearty laugh. The jokes will be new and the Oleo will offer a combination of clever stunts that will please the most festidious. The program will conclude with a side splitting farce entitled "The Booster Club from Blackville." In patronizing this performance you will not only enjoy an evening of pleasure but you will help the Academy in paving off the debt of $500 still due on the athletic field fence. They have already raised and paid $700.00 on this enterprise.

The several ball clubs of Bellefonte and vicinity used the athletic field all summer and were never charged a cent by the Academy. Surely this fact proves that the enterprise means a public benefit, and just as surely ought the public to heartily help Mr. Hughes in his efforts to pay off the debt.

The reserved seats chart will be open on Saturday morning Febv. 20th at 10 o'clock. Watch for the street parade at 2 p. m., Tuesday Feby. 23rd. Those purchasing advance tickets must not forget to get them exchanged for seat tickets.

Death of Ann Dunlop Harris

One of the saddest deaths that has occurred in Bellefonte for some time is that of Miss Ann Harris who passed away Wednesday morning at 9 o'clock at the Bellefonte Hospital after an illness of about ten days of typhoid fever. Miss Harris returned home a week ago last Monday from a trip to Philadelphia and was immediately taken sick and it is believed her disease was contracted while in Philadelphia. Everything possible was done to save her life but of no avail as she gradually grew weaker until the end came.

Ann Dunlop Harris was born in Bellefonte 22 years ago and was the daughter of John and Rachel Harris. Her father was in the drug business, but died a good many years ago. Her mother however survives with the following brothers and sisters: Joseph D., of Baltimore, Md., Charles and Guy, of Washington, D. C., George, of Pittsburg; Jennie and Mary at home.

She was a member of the Presbyterian church and a very bright and attractive young lady. The bereaved mother, brothers and sisters have the sincere sympathy of the entire community in their hour of affliction.

The Pennsylvania Railroad Will Not Extend Line From Lemont to State College.

At the meeting of the state grange a resolution was passed urging the Pennsylvania railroad to extend its lines between Lemont and State College. President McCrea took the matter up and drafted the following letter to the executive committee of the grange:

Your letter of Dec. 19, containing resolution adopted at a meeting of the Pennsylvania state grange held at Altoona, was duly received, and I have delayed giving you reply pending inquiry into the suggested extension between Lemont and State College. This matter is one which has previously received careful consideration, and I find that the additional revenue to be derived from such an extension would not justify the capital expenditure involved, particularly at this time when our resources are taxed to meet the requirements of existing lines.

Bellefonte and Nittany Furnaces to go Under one Management.

At a meeting of the stockholders of the Bellefonte and Nittany Furnace it was decided to form a company to operate both furnaces and with that end in view the following officers were elected: President, W. It is the intention to begin repairs at the Nittany Furnace at once and to have it in operation by the 1st of April. This will be good news to the people of Bellefonte and we hope the enterprise may be successful.

Inadequate Support.

Home merchants who are loth to support the local paper stand very much in their own light, for it is a well known fact inadequate advertising in the home paper gives encouragement to the mail order houses to enter into competition with them—and the outside concerns get the business.

THE LINCOLN-DOUGLAS DEBATE

Col. Austin Curtin Describes This Great Event and Gives Interesting Reminiscences of Lincoln.

Just at this time when all over the U. S. the celebration of the one hundreth anniversary of that great and good man Abraham Lincoln, the sixteenth president of the U. S. it occurred to me to tell some thing in your columns of what I knew about him years ago, and where I first saw and met him.

As far as I am aware no other men in Penns. had the pleasure of hearing the debate between he and Mr. Douglas, at least none in this section of the State except two others and myself, neither of whom are now living, Mr. Levi Davis and Mr. G. Irvin Davis both former Centre county men and residents of Bellefonte years ago. They lived in Freeport, Ill. and I lived in Ogle county, the same state, the place was twenty three miles south of Freeport. Thousands of people went to hear the two great men debate the issues of the day, one was running on the Republican ticket for Senator and the other (Mr. Douglas) on the Democratic ticket. It was in August 1858 when they met in Freeport. They spoke from the balcony of the Brewster house and the street in front was filled with people listening to one of the most interesting debates that was ever spoken, the contrast between those great men was wonderful, one tall, rather ungainly in appearance, smooth faced at that time, standing head and shoulders above his antagonist, with an exceeding pleasant voice, full of illustrations and sound arguments were his speeches, for each had two. The other, Mr. Douglas, short, smooth faced, fine hands and feet, large head with abundance of hair, good speaker, but was inclined very much to anger in his answers, while Mr. Lincoln was pleasant, turned all his antagonists anger into ridicule, thereby getting the best of him at almost every turn.

Years have passed since then and yet much and nearly all is vivid with me today. Mr. Douglas was elected and thus the whole matter of destiny was changed, we got by that defeat the greatest man who was under providence, to lead this American Nation to successful victory in the great war which followed, who with his patience, perseverence, good judgment and singleness of purpose brought every thing out as it should be and just when the great war was closed and peace once more was restored, he was struck down by the hand of a fanatical man who thought he was doing this country a great service, but which was the greatest and most dastardly deed ever committed. A nation went into mourning and is still so, for the great statesman and patriot, Abraham Lincoln.

I might add that a reception was held at the time of the debates between those two giants in intellect, and I had an opportunity of being one of the party who was shaken by the hand by Mr. Lincoln and had pleasant words spoken to me. The next time I saw him was when he was President and reviewed our regiment in the early fall of 1861 with General McClellan near Washington, where very many hundred houses are now built to the east of the Capitol. All the Army in the vicinity of Washington was reviewed at the time. We were not in any Brigade then but formed part of the army. Gen. McClellan was a short heavy man, fine looking, but Mr. Lincoln, although so much taller did not on horseback lack any thing in looks with any man. The next time I saw him was after Antietam in the fall of 1862 when he came to visit the Army and with Gen'l. McClellan, again reviewed the whole Army that had been engaged there, we were then part of the 1st Brigade, 1st Division Ninth Army Corps. By the time he came there he had grown whiskers which changed his appearance somewhat.

The next and last time I saw him was in the latter part of April 1864 when our army or rather our corps had re-enlisted and had been getting into shape at Annapolis, Maryland after the veteran furlough. When we thought we were going some were on an expedition on sea we were suddenly awakened to the fact that we were ordered to March for Washington, and passing through that city in the Course of a few days and thence on to the vicinity of Alexandria, Va. to go into camp. We had a chance to again see the President when we were on the March and as for me, I never saw him again. We were marched into Va. and soon found ourselves ready to cross the Rapidan river and took part in the Wilderness Campaign.

Now to go back to the contest between he and Mr. Douglass, who can say but for his defeat for Senatorial honors was ordered by a higher power that he would be the means of leading the people through that great conflict as in my opinion no other man could have done, the election to the Senate might have changed all that and made another history.

Yours Truly,

AUSTIN CURTIN.

—William Pierce, agent for the Carroll Comedy Company was in town recently purchasing the scenery of "The Dutchman's Honeymoon" company which broke up here last year.
